

'Together we Learn and Grow'

Curriculum Aim: 'To inspire learners to flourish in life' through providing a stimulating and dynamic curriculum that stimulates and engages the pupils.

Spiritual & Moral
Our aim is to promote the spiritual, moral, cultural, social, mental and physical development of pupils and prepare pupils for the opportunities, responsibilities and experiences of later life.

If we are to go forward, we must go back and rediscover those precious values - that all reality hinges on moral foundations and that all reality has spiritual control.
Martin Luther King, Jr.

Technology
Technology is progressing at such an incredible rate. It is our aim to ensure that we equip our pupils with the skills to ensure that are prepared to embrace this ever changing challenge. The real problem is not whether computers will be able to think but whether children are encouraged and developed to.

Technology is just a tool. In terms of getting the kids working together and motivating them, the teacher is the most important.
Bill Gates

Community
Our aim is to include both the immediate and the wider community in our learning through developing opportunities where our pupils can learn from others.

This world of ours... must avoid becoming a community of dreadful fear and hate, and be, instead, a proud confederation of mutual trust and respect.
Dwight D. Eisenhower

Health
Our aim is to expose pupils to a variety of activities and experiences related to health education, to help individuals develop a sound understanding of their total development and enable them to attain positive self-images, to provide opportunities for pupils make personal decisions related to their intellectual, physical and emotional development and to allow them to experience social relationships that will encourage appropriate behaviour, leadership and co-operation with others.

To keep the body in good health is a duty... otherwise we shall not be able to keep our mind strong and clear.
Buddha

At HBN we are proud of providing a broad and balanced curriculum. We are committed to providing rich and creative experiences which enable our children to develop skills that prepare them for their futures. We offer a wide range of opportunities for children to learn in different ways, catering for a range of learning styles. Our pupils learn to work both independently and collaboratively, developing an understanding of themselves as learners and recognising the ways in which they learn most effectively. We deliver high quality teaching and learning through cross-curricular, thematic activities; an approach that our pupils find engaging and inspiring, thanks to the variety and range of different activities on offer, and which allows them to make connections between the different areas of learning.

At the heart of our curriculum is a firm belief in promoting the dispositions embodied in our GROW attitude. We aim to develop pupils who show:

G - Grit (resilience in their learning)

R - Risk (take risks by challenging themselves and others)

O - Optimism (believe in themselves and see the best in others)

W - Work (have a good work ethic and know that learning can be difficult so you have to work hard).

Our curriculum recognises the growing role of technology in all our lives, and we ensure that our pupils develop the skills to make the best use of this in order to support their learning. We give them ample opportunities to become comfortable, effective users of Information and Communication Technology and to teach them how to use it safely.
